

## **PROTOCOLE® SERIES**

The PROTOCOLE® booths offer performance, quality and a professional image, no matter what the event or its magnitude. Its unique assembly concept, using plastic extrusions equipped with VELCRO® and the combination of soundproof technical materials, gives the cubicle an acoustic partition that surpasses the ISO-4043 international standard. Each PROTOCOLE® booth includes an anti-allergen interior finish, an AIRVAC® heavy flow air recycling system as well as an ATA-300 logistic container. The cubicles are available for 2 or 3 interpreters.
